Abstract

Customers, particularly those who shop online, have altered their behavior as a result of the COVID-19 pandemic. One study conducted in India discovered that the social distance and lockdowns caused by the pandemic altered the shopping habits of Indian consumers who shopped online. Consequently, this led to a growth in the number of people shopping online for items related to personal care and makeup, electronics, home appliances, entertainment apps, products related to exercise and wellness, household supplies, food, and groceries. Immediately following the outbreak, this tendency persisted. Additionally, the pandemic had an impact on the satisfaction and loyalty of internet shoppers. Several studies found that factors such as product quality, delivery speed, and customer service all had an impact on the pleasure and loyalty of consumers. The trust of customers was improved by the contactless delivery choices offered by e-commerce platforms. Online firms have been forced to react by providing customers with a buying experience that is both secure and convenient.

Keywords: Covid 19, Ecommerce, Online Shopping, Purchase Behavior, Pandemic

I. INTRODUCTION

The Coronavirus plague has impacted web shopping conduct. Social distance and lockdowns have prompted expanding web shopping. This decreases viral openness.
