Swaroop Aur AI Ki Bhumi'

Role of Artificial Intelligence in Cultural Tourism

Dilip Singh Rathore, Assistant Professor, Geography, Govt. Girls College, Magra Punjala, Jodhpur

Abstract

Cultural-Tourism provides economic, and social benefits at the local and national level. As we know that aggressive tourism activities without sustainability have created serious problems. As a result, it threatens the capacity of tourist attractions because of Socio-Economic problems. To overcome this urgent necessity is to promote Cultural tourism based on technologies. AI can ensure and support cultural tourism based on formulation of Panorama over historical Destinations. This form of tourism serves both the natives and the visitors of the unique tourism destination. The main objective of this article is to review the type of tourists arriving, seasonality and, more specifically, to focus on cultural problems and suggest action plans in a technical friendly way. There is need to consolidate efforts to make Rajasthan touristly attractive.
